BRINGING BATHROOMS TO LIFE, FOR LIFE

LONDON • PARIS • NEW YORK • BERLIN • MOSCOW • ATHENS • HONG KONG

WELCOME

Thank you for taking the time to look through our latest Design Guide and for considering Canterbury Sink & Taps' Bathroom products.

Today's bathroom has to fulfil many needs; it must be a room for the whole family to use and enjoy, as well as being a private space of tranquillity, repose and personal de-stressing. By investing in a timeless and modern classic from Canterbury Sink & Tap, you are choosing to increase the utility and value of your home today and for many, many years to come.

BIENVENUE

At Canterbury Sink & Tap we have a very simple philosophy; we try to bring together the ultimate fusion of the finest in nature. We bring you the best quality woods, delightfully hand-crafted stone, beautifully made ceramics and glazes, elegantly proportioned marbles, precision engineered brassware – all you need to do is give it the space and water to complete the ensemble.

WILLKOMMEN

We are a family-run company, and source products from the home of the Potteries in England and we want you to be more than happy with the quality, design and craftsmanship of our products and services; we want you to be delighted – in this way you will use us again and again and will recommend us to your family and friends.

BIENVENIDO

To learn more about us and to discover how we can help make your new bathroom space a unique area of tranquillity, sanctuary, relaxation and the utmost in style, call us on (03) 9899-3631, or visit us online at www.sinkandtap.com.au

Nicolas Hermence
Owner

PEOPLE OFTEN TALK ABOUT QUALITY AND PERFECTION

But what do they really mean? To us, it's about using nothing but the very finest materials and employing traditional, proven methods of production. Painstakingly hand-crafting every single piece, before subjecting it to rigorous, meticulous testing to ensure absolute excellence.

That's what quality means to us, and those are the lengths that we go to in our efforts to achieve perfection and bring you the most prestigious and beautiful bathrooms anywhere.

BRINGING BATHROOMS TO LIFE, FOR LIFE

EACH BATHROOM PIECE IS A TRUE LABOUR OF LOVE

It starts with a dream – a dream of beauty. So to begin to realise our vision, we first hand-build a master mould, refining it until it is absolutely flawless.

From this, a production mould is created, into which our skilled craftsmen pour clay slip that's been mixed to our own unique recipe.

After being set aside to cast, the mould is removed and the piece checked, then checked again, before being hand-glazed to ensure a flawless finish. Firing follows, at carefully managed kiln temperatures, for between 12-15 hours.

Once the pieces have cooled, a trained tester conducts a further 20 quality checks. Only when they are completely satisfied, is a piece given the Quality Standard Mark, allowing it to become part of a true bathroom of distinction. After all, to us, anything short of perfection means nothing at all.

BEAUTIFUL CERAMICWARE

In a world of mass-production, choosing an Canterbury Sink & Tap Bathroom is an opportunity to own something unique; an example of true British craftsmanship.

We still take days to produce each hand-crafted piece, combining the latest processes with skills passed down through generations of potters and artisans.

Such insistence on tradition is rare these days, but it's exactly what makes an Canterbury Sink & Tap Bathroom such a rare pleasure to own and cherish, both now and for years to come.

FINE FURNITURE

At Canterbury Sink & Tap, our enthusiasm for traditional values and commitment to excellence extends to our free-standing furniture ranges.

All our furniture is hand-crafted in the UK using timeless techniques and selected solid woods and real wood veneers, built to withstand life, even in the busiest bathroom.

As with our other products, Canterbury Sink & Tap's furniture typifies quality of construction and attention to detail rarely seen these days; another reason why Canterbury Sink & Tap is the right choice to make and invest in.

CAST IRON BATH TUBS

A free-standing cast iron bath can be the crowning glory of any traditional or contemporary bathroom, adding authentic period luxury. Historically, customers have had a wide range of charming free-standing designs to choose from; something we think should still be true today.

Therefore, Canterbury Sink & Tap offers a number of models supplied in a grey primer finish, allowing the exterior to be painted to suit your particular décor - an extra touch of individuality to further enhance the beauty of your new bathroom space.

SUMPTUOUS WALL & FLOOR TILES

Be it a sense of drama, or a simple yet stunning bathroom backdrop that you're looking to create, consider our three beautiful ranges - an exclusive and unique range of authentic handmade-effect wall and floor tiles.

EDWARDIAN	140
ANTIQUE CRACKLE	144
THE NATURALS RANGE	150

EDWARDIAN CERAMIC WALL TILES

Canterbury Sink & Tap Bathrooms are all about distinctive character and timeless design: a delightful and beautiful blend of modernity with tradition. To help you complete this distinguished look, average wall tiles simply won't do.

Thanks to the latest manufacturing technology these tiles combine to create the most exquisite period styled bathroom design featuring strong skirting tiles, luxurious lower wall panelling and elegant borders all finished with a unique wallpaper patterned classic upper tile.

ANTIQUÉ CRACKLE CERAMIC WALL TILES

Canterbury Sink & Tap is all about distinctive character and timeless design: a delightful and beautiful blend of modernity with tradition. To help you complete this distinguished look, average wall tiles simply won't do. That's why we created our own exclusive range of prestigious ceramic tiles to match your high and demanding expectations.

Thanks to the latest manufacturing technology these tiles have the handmade look with their gently irregular edges. The distinctive impression continues with the thick white body (a hallmark of top quality tiles) and an elegant lustrous surface with a subtle crystalline crackle-glazed finish, replicating the close-up patina of tiles first fixed centuries ago. Unlike old tiles, however, these deliciously rich, deep glazes won't stain or discolour in years to come.

PERIOD STYLE, MODERN QUALITY

Nothing creates that turn-of-the-century tiled look more convincingly than this classic brick shape. In the time honoured way you can add sumptuous detail with our collection of dado tiles, capping strips and glass mosaic tiles. All items are produced in seven soothing shades for you to match or, if you prefer, to mix in imaginative contrasting schemes.

OPTIONS

- a. 60 tiles/box. 120 tiles/square metre, minimum order quantity, 1/2 square metre.
 - b. 24 pieces/box. 8 pieces/linear metre.

EVERY COMBINATION IS UNIQUE

That's the beauty of a range of ceramic tiles that offers so many options. With square tiles, dado tiles, capping strips and glass mosaic feature strips you can bring shapes together in an infinite number of ways. Then enjoy the further dimension of colour by bringing one or more of the seven subtle shades into your design scheme.

THE NATURALS RANGE PORCELAIN WALL & FLOOR TILES

The Naturals Collection boasts all the aesthetic charm and appeal of real stone and can be used to create a stunning contemporary feel or even add a sense of history to a bathroom setting. Used to create a stunning, single colour backdrop or combined to provide a dramatic multi-coloured effect, it contrasts beautifully with the crisp white ceramics of Canterbury Sink & Tap's luxurious sanitaryware.

- c. 54 pieces per box.

NATURAL BEAUTY

Available in three colours – chalk, sand and charcoal – The Naturals Collection bears the illusion of natural stone courtesy of very modern manufacturing processes and a tumbling procedure that gives each and every tile a unique handmade appearance. The tiles also bear the illusion of real marble with their authentic soft, sugary appearance.

Unlike marble, however, The Naturals Collection features outstanding technical qualities and is free from the chores of maintenance. Resistant to abrasion and corrosion, these through body coloured tiles require no sealing and are virtually non-porous, which helps prevent staining and colour discolouration in years to come.

The Naturals Collection features three standard sizes – 300mm by 300mm, 150mm by 150mm and 100mm by 100mm – and Bullnose Battiscopa skirtings are available in 300mm by 95mm, and in all three colours.

Combining floor tiles from The Naturals Collection with Canterbury Sink & Tap's range of antique crackle-glaze ceramic wall tiles, particularly the White Linen, Cream Haze and Ivory Shell shades, guarantees a space of real distinction and uniqueness.

DRAMATIC LIGHTING

Beautiful lighting is essential in creating the appropriate mood and dramatic setting in any environment - where would this be more important than in your new bathroom? The bathroom is the one sanctuary where you can relax away the pressures of the day, and this philosophy is at the heart of Canterbury Sink & Tap's thoughtful and sensitive new lighting collection.

GUARANTEES, TERMS AND CUSTOMER CARE PURCHASING AND INSTALLING YOUR IMPERIAL BATHROOM

ENGLISH

GUARANTEES AND CUSTOMER CARE, TERMS AND CONDITIONS

SALES ORDERS

All orders must be faxed to Imperial (+44 1922 743180) or sent by e-mail export@imperial-bathrooms.co.uk. Unfortunately we are unable to accept verbal orders. The Buyer must acknowledge that he is aware of Imperial's Selling Terms and Conditions when placing the order. Cancelled Orders must be done in writing (by fax or e mail) to the sales office. If the order has been shipped or has been delivered, then there will be a 30% re-stocking fee applicable.

DELIVERY

Subject to stock availability, we would expect to ship the goods from our warehouse within 5 working days. If we are unable to ship the order complete, then we will ship the goods as soon as all item are available. The Sales office will keep you informed of your order status, and if you have any questions then please call the sales office on +44 1922 743074.

If a delivery has missing or damaged items, then you must inform in writing the sales office within 3 working days of receiving the goods (by fax or e mail). Failure to declare this within this timescale will make the claim void.

RETURNS

No goods can be returned to Imperial without authorization. Please inform the sales office of any returns, and obtain a Return Material Authorisation Number. Imperial will then contact you to make arrangements to have the goods returned.

TERMS & CONDITIONS

Please contact the Sales office for a set of our Terms and Conditions. These terms and conditions are governed by the laws of England and Wales and each party submits to the jurisdiction of the English Courts.

Other Conditions are as laid out by the Selling Contract & letter of introduction by Imperial

INSTALLATION & TECHNICAL SPECS

We recommend that all products are purchased with the assistance of a specialist bathroom retailer and always installed by an experienced installer who is a member of a recognised plumbing association. A list of bathroom retailers is available from our sales office and many retailers who display the Imperial product ranges can offer a complete design and installation service. Imperial Bathrooms Sanitaryware products are produced to the most demanding standards and each piece can be subject to as many as 15 individual quality control checks during production. Notwithstanding the high quality finishes achieved in the Imperial factory, all Sanitaryware is subject to the limitations of the ceramic manufacturing process. Unlike machine finished products, natural clay based products shrink and move during firing and, because it is not possible to control this process absolutely, minor variations in the dimensional stability of finished products will occur. In most instances this is not noticeable and will have no significant effect upon the installation or upon the look of the finished bathroom, but in any event these variations are normal and to be expected.

For further Technical Information and Dimensions please go to www.imperialtechspec.com or contact the sales office on +44 1922 743074

All products should be inspected before installation.

(i) Sizes all sizes quoted in this brochure are nominal. Actual ceramic sizes may vary by + or - 2% against the figures quoted in our technical data. When planning installations where dimensions are critical it is essential that the space allowed for individual items is physically checked with the products to be installed.

(ii) Wood Finishes - All natural wood finishes mature with age and Colours may vary slightly from batch to batch or from panel to panel. It is therefore not always possible to achieve a precise colour match when additional items are added at a later date.

(iii) Vitreous China These are extremely hard, non-porous products; but are also brittle and therefore must not be put under stress during installation. Basin waste fittings when over tightened can create stress within the ceramic material which may in time cause the failure of the product. Waste fittings should be carefully bedded in silicon and the back nut hand tightened. One additional quarter turn using a suitable spanner is sufficient to create the required watertight seal. Care should also be taken when fitting brassware in order to prevent similar stress related failures.

(iv) Cistern Flushing All Imperial Bathrooms WC pans and cisterns flush at 6 litres in compliance with European EN Standards

(v) Acrylic Baths - Acrylic bath sizes are nominal the final size often depending on the degree of detail incorporated in the design. All baths should be carefully inspected before installation.

(vi) Gold & Nickel plating all items supplied in Antique Gold or Nickel finish have been plated in the UK and the plating complies with British and European Standards relating to the products concerned. These special order items can not be returned to Imperial

(vii) Furniture - Imperial Bathrooms furniture is produced from a combination of solid wood and wood veneer panels, and all sizes quoted are nominal and must be checked against actual product. The timber used is supplied from renewable sources and whilst every care is taken in the manufacture of wooden products inevitably there will always be variation in both colour and grain pattern between individual pieces - indeed this is part of the beauty and unique appeal of using a natural material. Where frosted glass is a feature, only toughened safety glass is used.

(viii) Cast Iron Baths - During manufacture a thick coat of powder enamel is fused onto the internal surface of the red hot cast iron. This long established process can however produce ripples, small dimples and specks on the surface which are indeed part of the character and appeal of this type of product and it is normal and to be expected- the performance of the bath is however not affected.

(ix) Bar Pressures- The recommended operating pressure for taps, mixers and shower valves is from 0.3 Bar to 5 Bar. If the pressure is higher, a pressure reducing valve should be incorporated within the system.

(x) Tiles your tiles have been manufactured to simulate the look, (size, shape, colour, thickness, tone of glaze) of a hand made tile and, as such, are all different in appearance from each other. In order to obtain the best blend, we recommend taking tiles from a number of boxes on application. To obtain the best appearance, we recommend a 3mm grout line. Use only waterproo adhesives and grouts. For Further Technical Data and for further installation instructions on the Tiles please contact the sales office on +44 1922 743074

(xi) Basin stands are produced by hand and slight imperfections on the surface detail are normal due to the material and the manufacturing process.

(xii) The Hardwick glass legs are manufactured from Borosilicate 3.3 glass, 30mm diameter - Not toughened

LOOKING AFTER YOUR BATHROOM

Sanitaryware -The glazed finish of your Sanitaryware should be cleaned after use by applying a little cream-type cleaner. Apply using a sponge or damp cloth and rinse thoroughly with clean water. Cleaners containing abrasive materials should be avoided.

Antique Gold, Chrome or Nickel plated brassware and taps should be cleaned with warm soapy water and dried with a soft cloth. Under no circumstances should bleach or abrasive cleaning products, polishes, or detergent be used on plated surfaces and in particular should these materials be used on Nickel or Gold plated items it is possible that the surface will be damaged.

Acrylic baths should be cleaned using similar non abrasive cleaners.

Bathroom vanity furniture, Seats and Bath Panels can be wiped over with a damp cloth and dried with a soft duster. The use of polishes containing silicon or any abrasive materials can damage the wood finish. Natural wax polishes should be used sparingly and applied using a soft dry cloth.

Stone / Marble - To assist you in use, each piece of stone/marble has already been pre-sealed but will require regular maintenance with appropriate care and sealant products. We have used a special impregnation which optimally protects absorbent, stain-sensitive natural stone surfaces. It largely prevents the penetration of oil, greases, and water and makes further maintenance easier. Using the right ongoing care products will facilitate the cleaning process and will maintain a fresher appearance of your stone surfaces. We recommend that you re-treat your purchase on a quarterly or six-monthly basis dependant upon use.

Tiles should be cleaned by washing with warm water to which a neutral, clear, low sulphate detergent has been added. After cleaning, rinse well with clean water and polish with a clean soft dry cloth.

MANUFACTURING POLICY

1. The policy of the Imperial Bathroom Company is one of continuous improvement. We therefore reserve the right to alter or amend specifications/dimensions and prices without notice and to withdraw specific items/Colours without notice.

2. Colour reproduction in this brochure is as accurate as the variables in photographic and printing process will allow and specific colours may vary from actual products.

3. Great care is taken to ensure that products supplied by The Imperial Bathroom Company are supplied to you in perfect condition. Your purchases should, however, be checked for manufacturing defect (or damage) before any installation work is carried out. We are unable to accept responsibility for any defect which was evident before or has occurred as a result of installation.

GUARANTEES (EXPORT)

3. Imperial Bathrooms vanity furniture is guaranteed against manufacturing defects for a period of One Year from installation.

4. All Imperial Bathrooms baths carry a 5 years guarantee against manufacturing defects.

5. All components incorporated in Hydro Jet Whirlpool Systems are guaranteed for One Year.

6. All stone and marble products carry a One Year guarantee against manufacturing defects and does not guarantee against taining / discolouration.

7. Tiles carry a One Year guarantee against

manufacturing defects and does not guarantee against staining / discolouration.

MAKING A CLAIM UNDER THE IMPERIAL WARRANTY

To make a claim under the guarantee the following conditions must be met:

1. Proof of purchase should be supplied at the time of the claim.

2. Product should have been fitted in accordance with our fixing instructions, EN Standards and general good plumbing practice.

3. We need to ensure that the product has been maintained and cared for in accordance with our Care Instructions. We cannot accept responsibility for the failure of a product if it has been modified, misused, neglected or willfully or accidentally damaged. It should have been used for its sole design purpose

4. We must be given reasonable opportunity to inspect the product in the installed situation. If removed the product should be retained for inspection.

5. Our policy is one of continuous improvement. If the product has failed under the terms of the guarantee and a replacement is offered, but identical goods are no longer available, we will replace with the nearest equivalent.

6. This guarantee applies only to the single product in question and not to the whole bathroom suite.

7. We will not bear costs for repairs or replacements where the product fault is due to the following: Accidental or malicious damage, Improper use, Negligence, General wear and tear, Damage due to poor installation or, servicing or consequential loss, Where modifications have been made to the product, Where the product has not been used for its sole purpose, Inappropriate use.

8. These terms and conditions are governed by the laws of England and Wales and each party submits to the jurisdiction of the English Courts.

9. To the extent permitted by applicable law, other than the express warranty set forth in these terms and conditions, we (or any other third-party supplier) make no additional warranties, expressed or implied, and disclaim all implied warranties, whether in fact or by operation of law, statutory or otherwise, including warranties or conditions of merchantability and fitness for particular purpose. Any warranties that may not be disclaimed under applicable law are limited in duration to the warranty period. No warranties, expressed or implied, will apply after this period. In no way will we (or any third party supplier) be liable for any special, indirect, incidental or consequential damages, losses costs of expenses, however arising, whether in contract or tort, including without restriction, any economic losses of any kind, any loss or damage to property, any labour costs of refitting the product, any personal injury, any damage or injury arising from or as a result of misuse or abuse, or the incorrect installation, integration or operation of the product. We neither assume nor authorize any other person to accept any liability in connection with repair or replacement of the product. And we limit any claim to the value of replacement goods only and not any consequential charges (such as plumbing Costs).

10. Warranty is not transferable and applies only to the original purchaser / retailer.

INSTALLATION INSTRUCTIONS FOR LIGHTING FIXTURES

IP44 RATED WALL LAMPS - INFORMATION AND INSTALLATION

IMPORTANT INFORMATION: Imperial recommends that a qualified electrician should install your lighting.

Complaints made following installation cannot be accepted.

Thank you for choosing this product. It has been manufactured with care from quality materials and when installed correctly should give many years of trouble free service. To ensure your complete safety and satisfaction, before commencing any installation please ensure that you have read and fully understood the following instructions. Remember; if you have any doubts about connection please consult a qualified electrician.

IMPORTANT: We recommend that this lamp is installed by a qualified electrician in accordance with current IEE wiring and building regulations. These lamps are not suitable for outdoor use.

Resistance to moisture: These lamps have been tested and rated at IP44. When assembled & mounted correctly, they are suitable for use in Bathrooms (zones 2 & 3) Correct orientation of the wall lamps is essential to maintain this protection rating and is shown on the label inside the lamp back plate.

WARNING

Switch off electricity supply at fuse box before and during installation and maintenance. We recommend that the circuit fuse or breaker is withdrawn to prevent accidental switching on whilst work is in progress. Light fittings should be protected by a maximum 6 amp fuse / miniature circuit breaker (M.C.B.)

1. Remove the stainless steel mounting plate from the back of the lamp by unscrewing the allen screw in the top edge of the lamp back plate using the allen key provided.
2. Carefully mark the position of the fixing holes for the wall mounting plate in the desired position on the wall ensuring that the plate is the correct way up and not back to front. The wall lamps are quite heavy, and the mounting plate will need to be securely screwed to the wall using suitable fixings for the particular type of wall construction where the lamp is to be installed.
3. Taking great care not to interfere with existing cables or pipework, drill the fixing holes of a suitable size for the screws or fixings you are using.
4. Pass the cables from the wall through the plastic grommet of the mounting plate, and secure the plate to the wall using the screws or other fixings you have chosen. Carefully support the wall lamp, while making the mains connection as below.
5. The wires are coded as follows:
Brown - Live (L)
Blue - Neutral (N)
Green/Yellow - Earth (E) - THESE LAMPS MUST BE EARTHED
6. Connect the mains wires securely to the lamp as indicated above, using only the special terminal block supplied with the lamp. To open the terminal block cover, insert a small flat bladed screwdriver into both of the small slots on the front of the cover marked with an arrow. Pushing the

screwdriver down slightly and levering gently away from the housing will release the two small catches allowing the cover to be opened. When making the connection, ensure that no bare or loose strands of wire are exposed, and that the outer sheath of the supply cable passes through the special grommet into the connector box. Do not disassemble the connections made already from the lamp to the terminal block.

7. Secure the lamp to the mounting plate from the lower edge of the back plate first, sliding the lamp slightly upward to locate the tang on the mounting plate in the slot in the back of the lamp. Once located, bring the top of the lamp backplate toward the wall and secure by tightening the allen screw in the top edge with the allen key provided. Ensure that no wires are trapped when tightening the allen screw.

WATTAGE

Never exceed the maximum wattage as indicated on the bulb holders.

BULB REPLACEMENT

This differs between models: - Follow the directions below for only the model in use. In all cases, switch off the lamp and allow the bulb to cool prior to commencing.

Toledo Single and Double: Unscrew the glass shade and replace the bulb with the same type as marked on the bulb holder.

Brokton: (Shade and Bulb replacement). Unscrew the domed glass bulb cover complete with shade ring. (This is quite stiff due to its rubber sealing gland). Unscrew and remove the bulb. You can now fit the shade of your choice. With the shade seated on the bulb holder, screw in a new E14 screw cap tube shaped bulb of up to 40 watts maximum. Finally screw the glass bulb cover and shade ring back on to the lamp as a unit (it can easily be re-seated if they have come apart in disassembly).

Cadiz and Avila: Carefully remove the domed frosted glass bulb cover (this is a pull/push fit over the rubber seals at the base of the bulb holder). Unscrew the glass shade if greater access is required and pull out the old bulb. Replace the bulb with a G9 mains voltage halogen bulb of 40 watts maximum taking care not to let the bulb have direct contact with your fingers. Screw the glass shade back on to the lamp and finally push home the domed frosted glass bulb cover ensuring it is over the seals at the bottom of the bulb holder.

CARE OF THIS PRODUCT

Clean only with a dry soft duster. Do not use any proprietary cleaners and polishes, which may have a detrimental effect on the finish.

The Company reserves the right to continually evolve its product line without notification. The Company will not accept any liability regarding specification changes and their consequences unless previously quoted by the Company in writing.
